Summary

Software Engineer with hands-on experience in web development, RESTful API development, database design, and application deployment. Skilled in Node.js, Express.js, React.js, and PostgreSQL. Contributed to the development and deployment of a full-stack Alumni Portal featuring role-based access control, real-time notifications, and AI-powered content moderation. Strong problem-solving skills and a solid foundation in software engineering principles.

Education

Bachelor's Degree in Computer and Artificial Intelligence 2022 – 2026
Software Engineering Helwan University
Degree : Excellent "A" (GPA : 3.46)

Projects

Graduation Project (Excellent A+) 2025 – 2026
Alumni Portal
Role: Software Developer - Full Stack Developer
Designed and developed an Alumni Portal that enables graduates to connect, join communities, access university services, request official documents, and explore career opportunities. Built key modules including authentication, profile management, social networking, digital IDs, and administrative dashboards.

Language Used:
- **Backend**: Node.js
- **Frontend**: React
- **Database**: PostgreSQL

Inventory & Sales Management System 09/2026
Multi-Tenant SaaS Web Application
Role: Software Developer - Full Stack Developer
Designed and developed a multi-tenant inventory and sales management system that lets multiple businesses manage products, sales invoices, and purchase invoices in one platform. Built secure JWT authentication with automatic session expiry and role-based access, and enforced business rules such as blocking duplicate products in sales invoices.

Language Used:
- **Backend:** Node.js, Express
- **Frontend:** React, Vite
- **Database:** PostgreSQL

Trainings

ITI Summer Code Camp 2026 08/2026 – 07/2026
Web Development Using .NET ITI - 2026
- **C# & .NET:** Object-Oriented Programming (OOP) and core .NET development concepts.
- **ASP.NET Core MVC:** Models, Views, Controllers, routing, and application architecture.
- **Entity Framework Core:** Database integration, entity relationships, and data retrieval using Include and ThenInclude.
- **Database Development:** SQL Server, relational database design, and CRUD operations.
- **Practical Application:** Applied the concepts through hands-on development using a Student Portal Web Application.

Technical Skills

Web Development

- Frontend: HTML5, CSS3, JS (ES6+), Angular, React.js, Resp. Design
- Backend: ASP.NET Core (Web API, EF Core), Node.js, PHP
- Real-Time: WebSockets, SignalR

Databases

- Relational: Microsoft SQL Server, MySQL, PostgreSQL, Oracle
- NoSQL: MongoDB, Cassandra, Neo4j
- Caching: Redis

Deployment & DevOps

- Internet Information Services (IIS) Deployment for ASP.NET , Angular, React
- PM2 Process Manager for Node.js Applications
- SSL/TLS Configuration and Reverse Proxy Setup
- Environment Configuration & Production Deployment

Software Engineering & Architecture

- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
- Design Patterns: 3-Layer, Onion, Dependency Injection, Repository
- RESTful API Design & Integration
- Code Optimization & Performance Tuning
- Software Architecture & System Design

Soft Skills

- Problem Solving
- Teamwork
- Communication Skills
- Time Management
- Analytical Thinking
- Fast Learning
